Current date: May 30, 2025

PEM encoded chain:

[18:17:09] **Ragesh P.** : I am checking the issue. Please hold on.

[18:17:31] **Subramanian KN** : ok

[18:19:24] **Subramanian KN** :
[cnam.png]

[18:20:03] **Ragesh P.** : Thank you. Let me check that and get back to you.

[18:20:15] **Subramanian KN** : okk

[18:23:10] **Ragesh P.** : Thanks for waiting. The issue is due to the SSL certificate. This case falls into the area of responsibility of the SSL department. Please let me transfer this chat to the representative who will assist you better with your particular request.

[18:23:50] **Subramanian KN** : ok quick fast

[18:25:54] **Ragesh P.** : I am trying to transfer the chat as fast as I can.

[18:30:48] **Ragesh P.** : I regret to inform you that our SSL Team is experiencing a higher volume of support requests than usual. Thus, some delays in replies may occur. In case your request is not urgent, I suggest sending an email to sslsupport@namecheap.com, and we will get back to you as soon as possible.

If this option doesn't work for you, please let me know, and I will proceed with the chat transfer.

[18:31:22] **Subramanian KN** : ok

[18:32:13] [Olha S. joined the chat]

[18:32:13] [Ragesh P. left the chat]

[18:32:26] **Olha S.** : Hello, my name is Olha, I will be happy to assist you further. Please allow me 5-7 minutes to check your matter.

[18:32:44] **Subramanian KN** : ok

[18:38:06] **Subramanian KN** : hello

[18:39:21] **Olha S.** : I am with you.

[18:40:25] **Subramanian KN** : smartcliff.in i am run but in this error

Your connection isn't private
Attackers might be trying to steal your information from www.smartcliff.in (for example, passwords, messages, or credit cards). Learn more abou this warning
net::ERR_CERT_AUTHORITY_INVALID
Subject: *.smartcliff.in

Issuer: *.smartcliff.in

Expires on: May 30, 2026

Current date: May 31, 2025

PEM encoded chain:

[18:41:22] **Olha S.** : Unfortunately, I can see that the certificate is not shown as installed for your domain, you can check it here: https://decoder.link/sslchecker/smartcliff.in/443
May I know if the certificate files have been installed on the server?

[18:44:34] **Subramanian KN** :
[erro.png]

[18:46:36] **Olha S.** : Yes, there is a self-signed certificate shown as installed for your domain. The self-signed certificate is a dummy certificate that is just created artificially, and it is not trusted anywhere as it is not issued by a trusted certificate authority. You can download our certificate files from the email address sysadmin@smartcliff.in or account: https://www.namecheap.com/support/knowledgebase/article.aspx/9464/14/can-i-download-an-issued-certificate-on-your-site/

[18:46:46] **Olha S.** : Then the certificate should be installed on the hosting server. Certificate installation manuals for various server types can be found here https://www.namecheap.com/support/knowledgebase/article.aspx/795/69/how-to-install-ssl-certificates

[18:48:48] **Subramanian KN** : but i use in posstivessl wildcard

[18:49:16] **Olha S.** : Please double-check if it is installed on your server correctly.

[18:56:11] **Olha S.** : May I know if we are still connected?

[18:56:51] **Subramanian KN** : already check mam is correct installed check

[18:57:37] **Olha S.** : Could you provide me with a screenshot to check?

[18:58:48] **Subramanian KN** :
[shared image.jpg]

[18:59:00] **Olha S.** : Thank you for the screenshot, I am checking.

[18:59:05] **Subramanian KN** : ok

[19:01:35] **Subramanian KN** : is correct
[shared image (1).jpg]

[19:03:06] **Olha S.** : I can see that the certificate is incorrect since it is shown as issued by *.smartcliff.in on the screenshot. Our certificate has another issuer. Please try to reinstall our certificate again.

[19:03:44] **Subramanian KN** : but my PositiveSSL Wildcard is *.smartcliff.in based

[19:04:16] **Subramanian KN** :
[post.png]

[19:05:44] **Olha S.** : It is your common name for the certificate, however, it should be issued by the Sectigo Certificate Authority. You have a self-signed certificate that is also issued for *.smartcliff.in, and it is installed now.

[19:06:36] **Subramanian KN** : ok
plz step by step guide me i am first time host my website in aws server

[19:08:32] **Olha S.** : Please make sure that our certificate files are downloaded first. You can download our certificate files from the email address sysadmin@smartcliff.in or account: https://www.namecheap.com/support/knowledgebase/article.aspx/9464/14/can-i-download-an-issued-certificate-on-your-site/

[19:10:17] **Subramanian KN** : download my certificate
[cer.png]

[19:10:39] **Subramanian KN** : next step

[19:12:14] **Olha S.** : Great! Please double-click on the Server Certificates icon in the IIS Manager's home page, hover the mouse over the Actions pane on the right side of the window and click Complete Certificate Request.

[19:14:45] **Subramanian KN** : is correct
[shared image (2).jpg]

[19:15:54] **Olha S.** : Yes, please choose the .p7b certificate now for the first field by clicking the three-dot button.

[19:18:10] **Subramanian KN** : is correct
[shared image (3).jpg]

[19:19:11] **Olha S.** : Yes, please click the 'OK' button and check if the new entry appeared on the 'Server Certificates' page.

[19:20:50] **Subramanian KN** : created smartcliff.in
[shared image (4).jpg]

[19:22:11] **Olha S.** : Perfect! Now, please select the 'Sites' folder in the 'Connections' panel on the left side of IIS Manager and click on your website. Then, ir the 'Actions' panel on the right side, select Bindings....

[19:24:57] **Subramanian KN** : site is open but subdomain is api.smartcliff.in not run show the error

6934-f3788a80d83488a8.js:27

GET https://api.smartcliff.in/getAll/course net::ERR_CONNECTION_RESET

[19:25:41] **Olha S.** : Please allow me 5-7 minutes to check.

[19:25:49] **Subramanian KN** :
[sub.png]

[19:28:49] **Olha S.** : May I know if your subdomain is created as a separate website on the server in the 'Sites' folder?

[19:29:06] **Subramanian KN** : yes

[19:29:29] **Olha S.** : Thank you for the information, please allow me 5-7 minutes to check further.

[19:29:50] **Subramanian KN** : ok

[19:32:00] **Subramanian KN** : smartcliff is frontend
smartcliffapi is backend
[shared image (5).jpg]

[19:32:41] **Olha S.** : Thank you for the information.

[19:33:39] **Olha S.** : It is necessary to bind your certiifcate to the subdomain separately. Please choose the 'Bindings....' menu for it.

[19:35:38] **Subramanian KN** : i am already binding
[shared image (6).jpg]

[19:37:28] **Olha S.** : Thank you for the update, I am checking.

[19:37:32] **Subramanian KN** : backend and frontend is working sir/madam

thank you so much

[19:39:15] **Olha S.** : My pleasure! You can also refer to this guide on how to redirect your websites to the HTTPS protocol:
https://www.namecheap.com/support/knowledgebase/article.aspx/9953/38/iis-redirect-http-to-https/

[19:40:52] **Subramanian KN** : but www.smartcliff.in is not working

https://www.smartcliff.in

why

[19:42:09] **Olha S.** : Please allow me 5-7 minutes to check.

[19:42:55] **Subramanian KN** : ok

[19:50:42] **Olha S.** : I am in the middle of the investigation; please allow me 5-7 more minutes.

[19:50:59] **Subramanian KN** : Server Error

403 - Forbidden: Access is denied.
You do not have permission to view this directory or page using the credentials that you supplied.

show the error

[19:52:34] **Olha S.** : May I know if you see this error for www. subdomain?

[19:53:14] **Subramanian KN** : i am change the rule not show my page show in this error

Server Error

403 - Forbidden: Access is denied.
You do not have permission to view this directory or page using the credentials that you supplied.

[19:53:33] **Subramanian KN** : May I know if you see this error for www. subdomain?

yes

[19:54:26] **Olha S.** : May I know what rule has been changed?

[19:55:05] **Subramanian KN** : URL Rewrite Rule

[19:56:16] **Subramanian KN** : it ok it is working but www subdomain not working

https://www.smartcliff.in/

[19:56:26] **Subramanian KN** : how do solve

[19:57:53] **Olha S.** : Please try to create a separate binding for www.smartcliff.in. You can do it in the 'Sites' section by choosing the smartcliff.in site and clicking the 'Add' button the the 'Bindings....' menu. It is necessary to create new binding there and indicate www.smartcliff.in as hostname.

[20:01:17] **Subramanian KN** : is working in www.smartcliff.in
